The Hon. Wm. E. Dodge, of New York, ex-Congressman, whose wealth is estimated at $20,000,000, has been sojourning in Macon for several days, at Brown's Hotel, en route to New Orleans. He and his accomplished lady attended Divine service on Sabbath morning in the Presbyterian Church, and in the afternoon he delivered an affectionate and touching address to the Sabbath School children. Mr. D. is one of the most liberal minded, and public spirited men in the United States, and we learn is spending his immense income in works of benevolence and charity. He is eminently conservative in his politics, and yet no man in the nation exerts a more potent influence on the present administration. He speaks in glowing terms of the growing prosperity and general good order which everywhere reign in the South.

☞ Among the political prisoners recently embarked at Havana for the penal colony at Fernando Po, we are credibly informed, are two American citizens, Miguel de Embil and Juan Bellido de Luna, both of whom have been naturalized in New York. The horrors of the voyage, in which they will be treated with almost the severity which characterized the slave trade, and the terrors of the climate to which they have been exiled, combine to make their punishment even worse than that of death itself. Their case is certainly one deserving the investigation of the American authorities.

Carlos de Castello, President of the Banco de Aborra, and old man of seventy years, and Manuel Requisine, a prominent Havana merchant, both men of wealth, have also been shipped to the same destination. We are informed by parties from Havana, that the offences in each case were more of suspicion than fact, and that the punishment is altogether inhuman, loudly demanding the interference of civilization in their behalf.—*New Orleans Times.*

Massachusetts and Georgia as Rivals in Cotton Manufacture.

Says the New York World, "If there is any one branch of industry in which the Bay State ought naturally to evince more energy, activity, and expansion than in any other, it is cotton manufactures; yet the total amount of capital invested in that branch of industry in 1855 was 32 millions (gold valuation) and in 1865 33½ millions—or an increase of 1½ millions for a period of ten years. Considering the golden opportunities Massachusetts has enjoyed, in various ways, during that term, such and so small an increase is startling. Clearly, it is not to that State we must look for a successful overthrow of the English control in cottons abroad. Why, Georgia will do better than that ten years hence; and, if Massachusetts does not move faster during the interval, she will lose her trade. She must recognize the revolution which is going on at this moment in the whole range of industry to which her capital and labor have been applied in years gone by, and shape her course accordingly. There are few things less improbable than that Southern markets will, at a not very distant day, be wholly supplied by Southern mills; not by Eastern one's as heretofore and now.

"But the lack of progress in cottons was no greater than that noticeable in paper, iron, leather, and the fisheries."

Adds the Tribune: This is just what we have all along urged; yet to The World it seems a new revelation. Massachusetts has "got her growth" in manufactures; it is now the turn of those States which have cheaper Labor, cheaper Coal, and an immensity of unused Water-Power. The Sprague are probably the most extensive and successful cotton manufacturers in America, and they have lately built or projected three vast new establishments: one of them in Connecticut; a second in Maine; the third in South Carolina. Massachusetts, as The World shows, has scarcely extended her manufactures since 1855; meantime, those of the West have quadrupled. We believe there are, to-day, more woolen factories on the Mississippi and its tributaries than east of the Delaware; if not, there soon will be. It is Missouri, not Pennsylvania, which is to be most signally benefitted in the next decade by Protection to Iron. Massachusetts fought Protection vehemently down to 1824; and she can now do without it far better than Georgia can; for her mills are built and stocked with first-rate machinery, which Georgia sorely needs. But Protection has done her excellent service; and we trust she will help us to diffuse its blessings to States which slavery or lack of population has hitherto rendered incapable of profiting by its benignant influences. "Let the coast go round."

Mr. Sprague said the other day in a speech in the Senate:

"A few weeks since, in order to understand something of the condition of the South, I visited Georgia, and naturally was invited to inspect a cotton mill. In the city of Augusta, Ga., is a cotton mill that to-day will surpass and does surpass, in the success of its operations, the best one in New England; and the secret of that success lies in the turn of one roll where the cotton is delivered on the spindle, it turning at one hundred and fifteen turns to the minute, where others in New England, and even by the side of it, turn ninety or one hundred."

THE COST OF A COTTON FACTORY.—The following estimates are furnished by Mr. Montgomery, of New York, of the cost of machinery for a cotton factory of moderate capacity, proposed to be built in Jefferson, La.:

COST OF 1000 "RING" SPINDLES AND PREPARATION—MACHINERY.

1 Mason's whipper,	$ 75
1 Picker and lapper,	350
4 Double doffin cards,	1.000
1 Drawing frame, 3 heads,	225
1 Snubber, 36 spindles,	700
1 Fly frame, 48 spindles,	800
1000 Ring spindles, at $4 each,	4,000
2 Reels, $35 each,	70
1 Building press,	50
1 Baling press,	75
	$7,345

FIXTURES.

4 Sets card clothing, at $60,	$ 240
Cans and bobbins,	200
Shafts, pulleys and belts,	700
Turning lathe,	50
1 Ten-horse power engine,	1,300
Extra charges for fitting up,	150
	$2,540

Total cost of machinery and fixtures, $9,885

The above is a detail of the cost of 1,000 spindles and preparation, without looms. Without going into detail, $10 per spindle is a safe calculation. One hundred spindles is a common estimate per horse-power.

Twelve looms with accompanying machinery consumes one-horse power. Forty looms should be allowed to 1,000 spindles for spinning medium Nos., say 20s and 30s. Looms cost $65 each.

The cost of 1,000 spindles, with preparation and weaving machinery, would be as follows:

Whole cost of 1,000 spindles and preparation, (deducting price of reels and bundling press, which are not needed for weaving,) is	$9,765
Forty looms at $65 each	2,600
One dresser	450
One warper	100
One spooler	80
Extra charge for steam engine, say	350
Extra charge for shafts and belts	250
Total	$13,595

From this detail, it appears that the cost per spindle, with looms, is $13 60, but a safer calculation would be $14 00 per spindle.

For 100 spindles without looms, I would recommend a one story building 100 feet long and 50 feet wide. For two or three thousand spindles, let the building be two or three stories high, each story the same in capacity as above recommended.

* * * A building at the South, with the same cost of labor and material, could be erected much cheaper than one adapted to our Northern climate.

The return from cotton in well arranged mills is 85 per cent. A loom in fair operation will produce 32 yards per day, running at 100 picks per minute, and making cloth 64 picks or threads of weft per inch.

SALARIES OF RULERS.—The Emperor of Russia gets $25,000 salary a day; the Sultan $18,000; Napoleon $14,219; the Emperor of Austria $10,000; the King of Prussia $8,210; Victor Emanuel $6,340; Victoria $5,270; Leopold, of Belgium, $1,443, and President Grant $68 80.

Africa our Source of Labor Supply.

Some of our good friends were quite startled a week or two ago when we proposed to supply our deficiencies in laborers by importations from Africa. The more we think about it the more firmly are we convinced that this is not only the best, but the only practicable source of supply to the Southern planters. It is the sort of labor that suits the cotton, rice, and sugar fields, and that can survive in the malarious districts of the South, except, perhaps, the Chinese; and in every respect, moral and physical, we think the negro far preferable. If people will only consider for one moment, and divest themselves of the traditional prejudice against the *slave trade*—a very different thing—we think they would come to the same conclusion. Our Northern friends, too, might have to get over some of their crazy fanaticism over everything that has a woolly head and black skin, in order to allow the importation of Africans to go forward unmolested. Conducted strictly according to the immigrant laws, in vessels favorable to health, and with the cargoes limited, the importation of such laborers may be made a blessing both to them and to us.

But we do not refer to the subject now for the purpose of discussing it. We intend to do this at a future day, and by unanswerable arguments establish the wisdom and practicability of the policy in question. Our purpose now is simply to show that other persons in the South—men of distinction as well as good sense—are turning their attention to the subject and arriving at the same conclusion with ourselves. A correspondent of the Louisville Courier-Journal, who recently traveled on the Mississippi in company with General Forrest, writes to that Journal:

A few days ago General Forrest and Major Minor Merriwether, engineer of the levees on the Mississippi, were my companions part of the way from New Orleans. As we passed through beautiful tracts of country lying waste, I asked General Forrest how it could ever be repopulated.

"With negroes," was his reply; "they are the best laborers we have ever had in the South. Those among us behaved during the war in such a manner that I shall always respect them for it, and I would not have one of mine, nor have them enslaved if I could. My house servants are with me yet in Memphis, and never would leave me."

"But how, General," continued I, "are you to re-populate with negroes?"

"Get them from Africa," was his startling reply; "they'll improve after getting here; are the most imitative creatures in the world, and if you put them in squads of ten, with one experienced leader in each squad, they will soon revive our country. I want Northern men to come here, and would protect any man who comes to build up the country, with my life; but they won't come; Europeans won't come; then, I say, let's get Africans. By pursuing a liberal policy to them we can benefit them and they us. The prisoners taken in war over there can all be turned over to us and emigrate and be freedmen here."

"I had an interest," continued he, "in the Wanderer, and we brought over four hundred; only six per cent. died. They were very fond of grasshoppers and bugs, but I taught them to eat cooked meat and they were as good niggers as any I ever had. When prejudice gets over our government will foster this scheme. There is no need of a war of races. I want to see the whole country prosper. It's my country, and I don't intend to give it up as long as I can do anything to build it up. I'm an American, and from the day I surrendered have been for the United States."—*Savannah Republican.*

Our New Job Office.

We have an entire new JOB OFFICE, embracing presses, types, borders, cuts, rules and everything pertaining to a complete outfit.

We are prepared to fill all orders for plain, fancy and ornamental work, in the neatest style, on the shortest notice, and at the lowest living rates.

We respectfully solicit the patronage of our friends and the public generally.

☞ The Washington Star says the indications to-day are that the Senate will repeal the Tenure-of-Office bill, though the vote will no doubt be very close, the friends of the repeal claiming only three majority.

BRIDGE DESTROYED.—We understand that the bridge on Gravelly Run, on the Vaughan Road, Dinwiddie county, a few miles from Petersburg, was destroyed by fire two or three days ago. The fire was accidental.

☞ The cause which has brought Mrs. Stowe's Florida plantation into the market is said to be the insecure tenure by which that lady holds it. It was confiscated during the war, bought for a song, and now the heirs of the original owners are demanding their property in the courts.

THE NEGRO APPLICANT FOR THE POSITION OF MINISTER TO HAYTI.—Great efforts are being made to secure the appointment of Ebenezer D. Bassett, (colored) principal of a school in Philadelphia, as Minister to Hayti. He is endorsed by the national committee of colored men, Fred Douglass, Downing, Langston, and others, white and black.

☞ Mr. Disraeli usually dresses in a costume of black frock, buttoned high, and lightest trousers, with a stripe down the legs. A promonotory of thin hair in the shape of a disk runs out over his finely shaped head. He has no whiskers. His countenance is as it always is—a compound of supercilious audacity and craft. His face has nothing prepossessing about it His smile is cold when turned upon a friend, and frigid with mockery and scorn when turned upon a foe. It is a thinnish, jaded, imperturbable face—rarely rising out of its meditative repose, lighting up only occasionally with a dry humor of merciless sarcasm.

☞ There is now a company in Louisville Kentucky, engaged in the manufacture of sugar and syrup from sorghum. The Democrat of that city states that the articles manufactured by the company are excellent. The syrup brings readily eighty cents per gallon in the market. The sugar "in every respect—in color, brightness, and sweetness—is equal to the best refined 'A' sugar ever made." says that paper. It adds that it can be made for seven cents per pound—about one-third of the cost of imported sugar.

In speaking of the yield of sorghum per acre the Democrat estimates that an acre will produce nine hundred pounds of sugar or one hundred and fifty gallons of syrup, which, it contends, will pay better than corn or other grain.

THE WEEDS AND PESTS GENERALLY.—Deep plowing does well in the effort to exterminate weeds and pests of all sorts, says the Richmond Dispatch. In the preparation of corn land the use of the four-horse plow will do a world of service in putting under briers and weeds of all kinds so deep that they will not annoy the farmer during the year. And by close cultivation during the summer much will have been done to clean the land. A corn crop so tilled, followed by deep plowing and liming for a future crop, will more than probably give the famer a clearly and finely producing field.

Every farmer should strive to clean his land, so that he may have nutritious grass where he is not cultivating. Grass is more profitable than weeds and the land will produce it as well. Pests that are disseminated by seed should be carefully mowed every year before the seed mature. Those which spread from the root can only be gotten rid of by deep plowing, careful cultivation, and liming or proper manuring.

The farmer can not be too particular about cutting down weeds in summer before the seed mature. Once they are perfected, they are distributed by the winds, and the stock and birds, in all directions.

Deep plowing, hoeing, with successions of crops, including grass, will clean up any farm. This should be the ambition of every farmer. When he has real and nutritious grass in his resting fields he can live in abundance and make money!

☞ Every distillery in this district, except one, has stopped work, and hundreds of thousands of dollars worth of material and machinery are lying useless and worthless in them. It is a singular fact, too, that of all the whisky nabobs who carried on with such a great swell the two first years after the war, scarcely one is solvent—nearly all are bankrupts. The huge fortunes amassed in a few months have melted away, and revenue officers who became rich in a day by collusion with illicit distilleries are most of them reduced to absolute penury and want. This business was immense here at one time—now it is so insignificant that even the "ring" has been broken and its choicest spirits have vanquished.—*Richmond Dispatch.*

General Capron, Commissioner of Agriculture, has handed in his report for 1868. It contains the reports of the officers of the Department of Agriculture, with essays on the Southern cattle disease, grapes and vineyards, silk worms, pisiculture, experiments with pototoes, mineral manures, entomology, industrial colleges, the culture of forest trees, country roads, meteorology, consular correspondence, and other topics.

It is now admitted on all hands that the obstinacy of President Grant in refusing to listen to applications for office will secure the repeal of the Civil-Office-Tenure act by three majority, the Democratic Senators all voting for the repeal on principle. The lever thus used by the Executive to lift from the statute book this disgraceful and unconstitutional law is one of immense power. Washington city is swarming with office-hunters, and every Senator is besieged by hungry constituents, who not only clamor for place, but many of them clamor for small pecuniary accommodations with which to meet their current bills while this Senatorial contest over the Civil-Office-Tenure act continues. Hence a direct appeal is to the pockets of Senators to vote for striking off the Presidential shackles which a Radical Congress had forged for Andrew Johnson.

☞ A New England clergyman, one Monday last summer, visited the market in the morning. While there his attention was called to some very fine strawberries. He wished very much to purchase some, but it being so very early in the morning, it occurred to him that they must have been picked on Sunday, and of course he could not purchase or use anything which had been procured under such circumstances. He inquired of the farmer: "Mr. Smith, were these berries picked on Sunday?" Mr. Smith, with a sly twinkle in his eye, replied: "No, Doctor, they were picked this morning, but they grew on Sunday."

ASSOCIATED PRESS DISPATCHES

FROM WASHINGTON.

CONGRESSIONAL.

WASHINGTON, March 24.—SENATE.—The Committee on Foreign Relations reported a bill regarding the treaty of July 4th, 1868, with Mexico for adjustment of claims.

The Tenure-of-Office Act passed to the following effect:

The President may suspend during recess, and appoint another to perform the duties, reporting such suspension within thirty days after the next meeting of Congress, and nominating a successor. If the Senate refuses to confirm the nomination, also, by a vote, disapprove of the suspenpension, the suspended officer, at the end of the session, shall resume his office. The President need give no reason for suspension.

Executive session adjourned.

HOUSE.—Mr. Paine introduced a bill punishing civil or military officers having the power, but failing to enforce the fourteenth amendment, with fine and imprisonment.

Mr. Butler reported the Mississippi bill.

Mr. Beck moved to amend by giving the President power over the Provisional Governor.

Mr. Farnsworth gave notice that he would move to postpone the bill until next session.

Mr. Beck addressed the House in opposition to the bill.

The House then adjourned, on motion of the Democrats, by a small majority.

It is regarded as an unfavorable indication for the ultimate success of the bill.

The President has nominated Giles A. Smith for Second Assistant Post-master, Gen. Moses H. Grinnell for Collector of Customs of New York, and Wm. Price for Post-master General of Mississippi.

Out of quite a number of Northern officers, the Executive Session confirmed only Henry D. Moore Collector of the Port of Philadelphia.

INDIANAPOLIS, March 21.—Democrats have been re-elected in all cases of resignation to defeat the 15th amendment.

An extra session is called on April 8th.

WILMINGTON, March 24.—Capt. Hunter, of the steamer Fairbanks, arrived to-day, and reports that he passed fragments of the wreck of a schooner or brig off Cape Lookout, on the 23d, and picked up a trunk in which was found a book with the names of Jasper W. Haskell, Martha D. Haskell, Susan J. Haskell, Deer Isle, Friday, July, 1862. He searched among the fragments of the wreck and floating hay, but discovered no trace of any of the crew.

COLUMBIA, March 24.—The General Assembly, after a four months' session and the passage of seventy-four acts, adjourned to-day *sine die*.

IMPORTANT TO OWNERS OF MARBLE QUARRIES IN THE SOUTH.—We are informed by a gentleman connected with the department of Agriculture, at Washington, who is charged by the Commissioner with the duty of making a collection of specimens of all the varieties of marble in the United States, that it is desired by the department that all those engaged in the quarrying of marble, or who own quarries not now worked, will forward specimens of their marble, by express, directed to the Commissioner of Agriculture, Washington, D. C. The express charges upon such specimens will be paid by the Department. The specimens should be six inches long four wide, and one in thickness, and polished. A description should accompany, stating the location of its bed, the name of the donor, and briefly, all other items of interest concerning it, such as the extent of the deposit, when discovered, it now worked, etc. As fast as they are received the specimens will be arranged in a case for exhibition, in the musem of the department; each specimen will bear a label containing the information sent with it; and the collection will exhibit the resources of the whole country, State by State, in this natural production, for the most ready information of all. It is hoped that those who are able to contribute will make an early response to this effort of the department.—*N. Y. Tribune.*

ATLANTA MEDICAL COLLEGE.—The session of this College, for this year, commences on the third of May next. In another column will be found a list of its able Faculty. Parties desirous of studying the principles of this noble profession, will find Atlanta a healthy and desirable place, and the College to sustain its well-earned reputation in the medical world.

T. C. CHAMPE, Merchant Tailor, is in receipt of his spring stock, consisting in part of the most beautiful shades of Cloths and Cassimeres, all of which he will sell at very low figures for cash only. All work done to order and in the best style. No fit, no pay. Renovating and repairing done, also. march12-d3w.

PHILLIPS & FLANDERS, Whitehall street, have just received a large and well selected stock of Ladies' Shoes. march21-d6t.

ALLEN, PIERCE & CO.—Our friends, Allen, Pierce & Co., have opened up a new line of trade in this city. They have established a branch store at Conyers, which keeps them supplied with rabbits, squirrels, doves, etc., and they find ready sale for the large quantities which they receive daily. They also keep on hand eggs, butter and poultry.

HATS, Shoes, Staple and Fancy Dry Goods, at Phillips & Flanders, Whitehall street. march21-d6t.

BLANKS.—Sheriff's Deeds, Sheriff's Forthcoming Bonds, Superior Court Subpœnas, Land Deeds, for sale at this Office. mar6-d1f

GEORGE SHARP, JR.—The Live Jewelry Store has received a large assortment of Watches, Diamonds, and Jewelry, among which are one hundred gold and silver watches, at prices from $8 to $400 each. Mr. Sharp has had twenty-one years' experience as a watch maker, and guarantees to give satisfaction. He keeps a fine line of goods and offers them at reasonable figures.

ALL kinds of Binding and Ruling done as cheap as the cheapest, by W. R. Hanleiter, Granite Block, Atlanta, Ga. march21-d.

JUDGE JOHN D. POPE.—The Rome Commercial says the following handsome compliment to Judge Pope, who is now presiding in the Rome Circuit:

"The Judge presides with dignity, decides points of law promptly, preserves the best of order in the court room, and is, in our judgment, a sterling man, worthy to wear the mantle of past jurists, who reflected so much honor upon the Judiciary of our State. What has been said of him in the Atlanta Circuit we fully endorse."

"THE LIVE DRUG STORE."—French and American Window Glass, White Leads, Linseed Oils, Machine, Tanner's and other Oils.
march19-d1f. REDWINE & FOX.

THE STEPHENSON HOUSE AT ST. CATHERINES.—Beverly Tucker, Esq., so widely known in the United States, has leased the the Stephenson House at St. Catherines, Canada West, for a term of years, and will open it in May next. We learn that Mr. Tucker will have associated with him a thoroughly practical and experienced assistant, who will unite with him in sparing no pains to make this house one of the most agreeable resorts for all who visit it in their summer journeyings. St Catherines is situated twelve miles from the Falls of Niagara, three miles from Lake Ontario, and two hours ride from Toronto. Success to Bev.

"THE LIVE DRUG STORE."—50 gross Mason's Blacking; 100 dozen Paint Brushes; Painter's material of every kind.
march6-d1f REDWINE & FOX.

MACON AND WESTERN RAILROAD.—Capt. William A. Fuller, for fifteen years a conductor on the Western and Atlantic Railroad, and who justly acquired the title of "model conductor," we are pleased to learn is the General Passenger Agent of the Macon and Western Railroad. As the spring time is approaching when pic nic excursions will be the order of the day, we would state that Mr. Fuller can be found all hours during the day, either at the Freight Depot, or the General Passenger Depot, and will cheerfully give all the information required by the public relative to travel on this route.

COUNTERFEITERS ARRESTED.—Monday evening three men, named Pankey, Martin and Heppey, were arrested on the charge of passing counterfeit greenbacks. Pankey and Martin have been about this city for several years dealing in tobacco. Heppey, it appears, staid about Macon. They were suspected for a long time, and finally entrapped by a detective, who managed, while receiving from them some $2,050 of the "queer," to arrest one of the parties, and finally the others. Martin and Pankey were examined before United States Commissioner Smith on yesterday and day before, and committed. Heppey, we learn, will be examined to-day. The Martin alluded to is W. A. Martin, tobacco trader from North Carolina, and should not be confounded with an excellent gentleman bearing that name.

CLERKS, Ordinaries, and others of our friends in the various counties, will undoubtedly find it to their interest to send their orders for blank books to W. R. Hanleiter. State in the order the number of quires, size of paper, and style of binding, and, our word for it, satisfaction will be given, in both price and workmanship.

AGENTS make from $200 to $300 per month by selling Sewing Machines for
S. M. TOLIVER & CO.,
mar3-d6w Address them at Franklin, Ky.

TO BE INVESTIGATED.—We learn that at the next session of Fulton Superior Court the attention of the Grand Jury will be directed to the character of the telegraphic dispatches sent from this city to the New York Tribune and other sheets. As they are invariably a tissue of falsehoods, the parties sending these dispatches lie designedly, and for a purpose. The Northern public are warned against reports of outrages coming from that source. Rich developments are expected before the Grand Jury.

AGENTS make from $200 to $300 per month by selling Sewing Machines for
S. M. TOLIVER & CO.,
mar3-d6w Address them at Franklin, Ky.

A VALUABLE IMPLEMENT.—We had the pleasure yesterday of inspecting Hutchison's Cotton Seed Planter, Ridger, Seeder, and Cultivator, combined, and found it to be admirably arranged and well adapted for the purpose intended. It ridges the ground, marks, drops and covers the seed at one process. It will plant one row with, or two rows without ridging, and works easy with an ordinary team, the driver riding and controlling the machine. Its use will save the labor of twenty men. After seeding, the planter is detached and the machine used for scraping and cultivating the crop. It is equally as well adapted to the cultivation of corn and other cereals. The machine was invented by Mr. Henry Hutchison, and is manufactured at Three Rivers, Michigan. We learn that Mr. P. W. J. Echols will shortly have them on exhibition at his Mammoth Agricultural Implement and Seed Depot.

[Communicated.]

ATLANTA, March 24, 1869.

Dear Constitution: Of all the moneyed institutions in our community, the various railroads are certainly the greatest beneficiaries. Those centering at this point have been and are still, enjoying greater profits upon the money invested, and a greater degree of independence than any other institution. They are certainly the most universally patronized by our people. There is scarcely a man, woman, or child, (white or black) in this community, who does not, either directly or indirectly, patronize some of the railroads centering in Atlanta. A great portion of the travel between the North and South, between the East and West passes through the city of Atlanta. Now, considering all of the advantages which the railroads have, the profits they realize, etc., what can be the reason the traveling public do not enjoy the comforts and accommodations of a general Union Passenger Depot, fitted up and suitably arranged for ladies and gentlemen and their baggage. There was some excuse the first two or three years after the war closed, on account of the straightened condition of the various roads, but such is not the case now. The State road has paid into the State treasury hundreds of thousands of dollars since the war. The Macon and Western railroad declared a dividend of 14 per cent. with a surplus fund on hand last year. The Georgia railroad and the Atlanta and West Point railroad declared a dividend nearly equal to that of the Macon and Western road, so there can be no good reason given now. To the officers of the different railroads centering in Atlanta, we would say come up gentlemen, go to work, build us a magnificent Union Passenger Depot that will accommodate the travel, ornament the city, and honor yourselves. No other institution in our city, is so far behind in any one particular, as you are in this. Very truly yours. PROGRESS.

TAKE NOTICE.—At a special meeting of the Mayor and Council this evening, the following resolutions were adopted:

Resolved, That taxation being the main source whence the city derives its revenue, it is the unalterable determination of this Council to execute the laws relating to taxation vigorously, without regard to persons or circumstances.

Resolved further, That the sooner the municipal tax payers are made sensible of the fact that no longer indulgence will be extended to defaulters the better it will be for all parties concerned.

Resolved, That ignorance of the law is an excuse which defaulters need not expect this Council to recognize in future in any instance.

Resolved, That the Marshal is hereby instructed to proceed to collect the taxes now due the city according to law.

Passed in Council 23d March, 1869.

A true extract from the minutes.

S. B. LOVE, Clerk.

It will be seen from the above proceedings of Council that it is made my duty to proceed at once to collect all taxes that have been placed in my hands. I have a large number of Executions for special tax upon sales for the year 1868, some for four quarters, some for three and some for two, also for one, all ending on the 31st of December, 1868. I have also a large number of executions levied upon real estate for general tax for 1868, which will be sold on the first Tuesday in April next, if not paid before. I hope all parties interested will take due notice and govern themselves accordingly. Capt R. H. Norris will be found at my office daily from 9 o'clock, A. M., till 12 o'clock, and from 2 o'clock till 5 o'clock, P. M., until day of sale, for the purpose of receiving the tax, and in the meantime I shall wait on the merchants at their stores for the purpose of receiving their tax upon sales up to the 1st of January, 1869. I trust that no one will put me to any trouble, as I must do my duty.

Lancaster and Atlantic, passing through the mountains, and over which passes the produce and passengers of the Great West to Atlanta, and from Atlanta diverges the Georgia Railroad, leading to Augusta and Charleston, S. C.; the Macon and Western Railroad, connecting at Macon with the Central Railroad leading to Savannah, and the West Point and Montgomery railroad, leading to Montgomery and Mobile, Ala. There are also two other railroads in contemplation, viz., the Atlanta and Jacksonville Railroad, which is to be put under contract very soon, connecting with a road running to Decatur, Ala., and then connecting with the great Memphis and Charleston Railroad, forming a direct line from Memphis to Charleston, S. C., through Atlanta. The Air Line Railroad Company has lately been organized, and the work commenced and will soon be completed, forming an Air Line Railroad direct from New York to New Orleans. The Air Line from New York to Atlanta, connecting them with the West Point and Montgomery, forming the Air Line road to New Orleans, makes Atlanta the terminus of seven of the most important railroads in the Southern States. Atlanta, beside being a great railroad centre, is now the permanent capital of the State, and is unsurpassed for health, delightful climate and good water, by any city either North or South, and its rapid growth, (having increased in population in less than three years from 10,000 to 25,000, and increasing in wealth in proportion, both of which is without parallel in the history of any Southern city, or very few of any other country), should be satisfactory evidence that capital cannot be more profitably invested anywhere than in Atlanta. The great want of a hotel of sufficient capacity to accommodate travelers that pass through Atlanta is still further evidence that it is the place of all others to invest capital in Hotel Keeping. The Washington Hall Property is most admirably located for that business, being situated within 60 feet of, and fronting upon the beautiful Park, and only 80 feet from the passenger Depot, thereby saving omnibus fares, expense of moving baggage, and fronting 180 feet upon the Park, and extending 300 feet upon the Georgia railroad right of way, and being within 100 feet of the geographical centre of the city, and also of the business centre, makes it every way the most desirable unimproved property in the South for hotel purposes. The property will be sold for one third cash and the balance on six and twelve months. There is no place in the country, North or South, where building can be done cheaper than in Atlanta. The titles to the above property are indisputable, and the sale will be positive. WM. MARKHAM.

READ, O WOMAN!—As health is the greatest blessing on earth, so is disease the greatest curse. The first wish of the heart, therefore, in a temporal view, should be health. Nor is this all. As disease renders us unfit to perform the various duties appropriate to our station in life, there is a moral obligation resting upon us to preserve our physical integrity, by using the means at hand for repelling disease.

Now there is nothing so destructive to health in females as a continued *suppression of the menses* It is a condition which makes a woman useless to herself and a burden to her friends. Dr. J. Bradfield's *Female Regulator, Woman's best Friend*, is the only certain cure. Lose not a moment in embracing the remedy feb14-4f

DR. J. BRADFIELD'S

FEMALE REGULATOR,

Woman's Best Friend

THIS valuable Medicine is prepared for WOMEN exclusively, and to be used by WOMEN only. It is adapted especially to those cases where the women is disordered, and will cure any irregularity in the "menses," except in such cases as require a surgical operation. As these last are very rare, the FEMALE REGULATOR is of almost universal application. In a sudden check of the "monthly courses" from COLD, trouble of mind or like cause, it acts like a charm, by RESTORING THE DISCHARGE IN EVERY INSTANCE, thus relieving the fever, headache, pain in the small of the back and "lower stomach," flushes of heat about the face, chilly sensations, burning of the eyelids and general restlessness. Taken in time, all these symptoms pass away immediately, without injury to the constitution. Frequently, however, the proper remedy is not applied in time, the disease becomes chronic, and the foundation laid for numberless evils to the constitution of the woman. The next "era" comes around and there is no "show," or perhaps the "whites" will appear. There will be some uneasiness about the womb, but very little or none of the natural fluid escaping. The complexion becomes sallow, bowels swollen, a sort of greenish caste about the face, constant dull aching pains in the head, weight in the lower stomach and back, with or without whites, palpitations of the heart, pallor, exhaustion, indigestion, weariness, languor, aching across the loins, loss of appetite, pain in left breast, tightness across the chest, cough and giddiness. If still allowed to go on, "green sickness" will be fully developed, the headache becomes severe, with loss of memory, diminishing sensibility, SICK STOMACH, dyspepsia, no relish for food, loss of flesh, increased fluttering of the heart, SWELLING OF THE FEET, legs and body and occasional shifting of blood. The slightest effort causes HURRIED BREATHING, almost SUFFOCATION. The skin is flabby and a "doughy feel." This is a sad picture, but it is the condition of thousands of women between the ages of 15 and 45, who are brought to the verge of the grave by ignorance or neglect to take the proper remedy. To all who are afflicted with any of the symptoms above mentioned, in connection with an irregularity of the "monthly sickness," we earnestly say TAKE Dr. J. BRADFIELD'S FEMALE REGULATOR. A few ounces taken, you will at once experience its benefits, and with a little patience you will be fully restored to health.

This remedy has been extensively used for upwards of twenty years by many of the most experienced and successful Physicians of Georgia.

We repeat, that Dr. J. BRADFIELD'S FEMALE REGULATOR is prepared for WOMEN and to be used by Women only.

A trial is all we ask.

Price, $1.50 per Bottle.

☞ Sold by Druggists generally.

ATLANTA, Ga., December 20th, 1868.

DR. J. BRADFIELD: Dear Sir: I take pleasure in stating that some time previous to the late war, I used, with the utmost success, on a servant girl, your FEMALE REGULATOR, prepared then at Bradfield's Drug Store, West Point Ga. She had been suffering severely from suppressed menstruation, and this Medicine soon restored her to health. She is, to-day, living in Atlanta, sound and well.

I will state further, that I know of its being used, with equal success, on a servant girl of my brother-in law, Professor Rutherford, of Athens, Ga. This woman had, I think, been diseased for six years. She was a house servant, and seemed cured, up to the time of "freedom." I do not hesitate to indorse your preparation for the purposes for which you recommend it.

Yours truly, JNO. C. WHITNER.

STATE OF GEORGIA, TROUP COUNTY.

This is to certify that I have examined the recipe of Dr. Joseph Bradfield, of this county, and, as a medical man, pronounce it to be a combination of Medicines of great merit in the treatment of all the diseases of females for which he recommends it. WM. P. BEASLEY, M. D.

This December 31st, 1868.

ATLANTA, GEORGIA :::::MARCH 24

A PACIFIC RAILROAD TOWN.

Curious Scenes at Bryan, Eight Hundred Miles West of Omaha.

"Carleton" writes to the Boston Journal the following account of the present terminus of the Union Pacific Railway—the town of Bryan, eight hundred miles west of Omaha:

The United States, at the present time, can exhibit one thing not to be found in any other country—a Pacific Railroad town. By that we do not mean a town like Omaha, which is an old established city, but not one of the mushroom places which grow up in a night, last a week or two, and then are torn down and moved on to another locality. The railroad is pushed forward so fast, and the terminus gets changed so often, that a town only gets under way before it is pulled down and sent forward to a new place. You can find houses at the present terminus, Bryan, eight hundred miles west of Omaha, which have been put up and taken down fifteen or twenty times. The people who live in them are American Arabs. They are not only nomads, ever on the move, but they can steal and plunder as adroitly and with as little compunction of conscience as their brethren the Bedouins. Civilization and Christianity have not refined or softened their inhuman nature.

Let me not be understood to say that every man in one of these railroad towns is a villian or a blackleg; on the contrary, honest men are to be found who, after bearing patiently with ruffians till patience ceases to be a virtue and there being no law or order or organized society, take matters into their own hands and become a terror to evil-doers. When some flagrant crime has been done—murder or assination—these law-abiding men purify the place by hanging the murderers to the nearest tree, or if no tree is near, they extemporize a gallows by tilting up the tongue of a wagon and sending the ruffian into eternity before the body of his victim is cold. Such sudden punishment is like lightning on a sultry day—purifying and invigorating.

It was late in the evening when we entered the new town of Bryan, then about two weeks old. We rode up a wide street, bright with lights flaming in the windows of the restaurants and saloons, each shopman and bar-keeper trying by arrangement of kerosene lamps and colored glasses to outshine his neighbor in his endeavors to attract a crowd.

"There was a sound of revelry," and Bryan had gathered the largest part of her population for a high time. There was such dancing and fiddling, such drinking of healths, shuffling of cards and rattling of dice, as we never saw before. From the dance saloons came the sound of hurdy-gurdies, violins and banjoes, the rattle and clatter of the double shuffle and plantation breakdown, mingled with shouts and oaths, the jingling of glasses, as the rude men, wild with whisky, and ruder women, decked in silks, satins, flounced and ruffled, and glittering with trumpery jewelry, went whisking in each other's arms round the room.

The railroad company have laid out the town and are selling lots at high prices. Of course these lots will have very little value after the road is opened, but the town is built as if there was a limited amount of land available for a city. The shops and houses are all crowded together, and if a fire were to break out on the windward side, all would go.

Here is a town two weeks old, with a population of five thousand! On every side we hear the sound of saws and hammers. Here is a man putting up his shop, which he has brought from the terminus at Green River. The boards are all numbered like those of a window shutter. He will have it complete in an hour or two, his goods in and ready for trade.

Here is a German and his wife unpacking the chests which contain mugs and glasses. In a few minutes he will have a lager-beer saloon in operation.

Yonder a Yankee has established a bakery, building his oven of bricks made on the spot. He is selling hot gingerbread and seed cakes, and has a large pile of bread in one corner and pumpkin pies on his shelves.

The saloons during the day are not much patronized, but are thronged at night. It is a lively town. The whole population live on a small territory, and are dependent wholly upon the railroad for supplies. Were the cars to stop running, the community would be brought to the verge of starvation in a week; but that contingency is not thought of, and this crowd of railroad followers are here to gather up the spoils which pass from the treasury of the company through the workmen into their hands.

SPRING BONNETS.—The principal importers of millinery goods had their regular spring opening in New York a few days since, and as the inevitable Jenkins was on hand, we are enabled to inform our fair readers that the bonnets are to be very small, without crowns, and some styles are high in front. In fact, the style is only a new and revised edition of the pretty Fanchon. Bonnets are to be elaborately trimmed, to correspond with the present style of costume, trimmed with laces and flowers; ribbon is sparingly used. Roses in all colors and shades, from the richest to the most delicate tints, will be more in vogue than any other flowers.

Some of the roses are very large, one covering the entire top of the bonnet, from which falls a vine of half opened roses and buds, with green leaves, not at the side, as last season, but straight down. Lace is also much used in sashes or veils, falling at the back. The new color in flowers which will be most worn for the present is "aspicine," a dark, warm color, with beautiful tints. Green grasses will be much in vogue, and occasional autumn-tinted grasses are seen upon a lace bonnet or fancy straw.

A new style of fancy straw is close in front without face trimming. With this the hair should be in waved rolls. Lace veils, joined with satin bows, fall from the back, and over these are trailing elements, and on the top a large flower with crystalized green leaves. A corn-colored crape has the sashes of crape at the back, edged with wide black lace, and the entire bonnet covered with a profusion of flowers. A white tulle made over the transparent frame is a novelty. There is a diadem of straw with green grass across the front, and falling at each side, trailing along the lace which forms the circle in front. A white fancy straw trimmed with purple satin is very pretty. Another novelty is a bonnet made of satin reeds on wire running two or three times across the front, then falling in horizontal loops at the back. A small rose in front, a very large one on the top, and a trailing vine at the back, completes the trimming. Wide and long white ribbon strings—not to be tied—are draped below the throat by a green velvet loop.

☞ The following is an extract from a private letter written by the proprietors of the Plantation Bitters:

"We had no conception of the wide-spread suffering which exists, or of the almost infallible cures produced by the Plantation Bitters, when we first commenced offering them for sale. We now find that every house has a weak child, an ailing parent, or debilitated aged member, who needs this Tonic. Our Laboratory has grown from a single room to an immense building, and our sales from a few bottles to many hundred dozens per day, and we are glad to know that they have done you so much good.

PARR'S

Prophylactic Fluid.

Letter from Hon. Alex. H. Stephens, of Georgia

CRAWFORDSVILLE, GA., Sept. 29th, 1869

Darby's Prophylactic Fluid is an article of little cost, but great value. Its domestic as well as medical uses are numerous, while its specialities are most wonderful. I have not been without it for ten years, and no head of a family who can afford to have it should be without it.

ALEX. H. STEPHENS.

The Wonderful Family Medicine.

Letter from the Surgeon General of the late Confederate States.

RICHMOND, VA., Jan'y 14, 1868.

John Darby & Co., No. 160 William St., N. Y.

Gentlemen: I have received your letter of the 15th of December, 1868 calling my attention to your (Darby's Prophylatic) Fluid.

I most cheerfully state that the Fluid was furnished to, and extensively used by the Surgeons in charge of General Hospitals in the Confederate service with great benefit to the patients—all the surgeons making a favorable report—a great deal of it was used in the hospitals.

Very respectfully, your ob't serv't,

SAML. PRESTON MOORE, M. D.

THE ASTONISHING DISINFECTANT.

EMERY COLLEGE, OXFORD, GA.,

December 28th, 1868.

Prof. Darby: Dear Sir—Having not been engaged for many years in the active duties of the Medical Profession, I am only superficially acquainted with the claims of your Prophylatic Fluid, but am well acquainted with its chemical elements.

While, therefore, I cannot speak experimentally of the value of the compound, yet the disinfecting and Therapeutic properties of the agents employed in its composition, together with the well known reputation of its discoverer, as a chemist authorize me to regard its merits as of a high order;—on the whole it must be considered as a valuable contribution to the class of articles to which it belongs.

These views, I may add, are sustained by the testimony of many competent judges, who have tested its properties.

Believe me, dear sir, yours respectfully,

A. MEANS, M.D., LL.D.

ALABAMA INSANE HOSPITAL,

TUSCALOOSA, December 23, 1868.

Messrs. John Darby & Co., 160 William St., N. Y.

Gentlemen:—I received your Circulars of the 10th inst., asking an expression of opinion from me as to the merits of your Prophylatic Fluid. The preparation has been so generally used by the profession and public at large and so universally esteemed, that it seems to me to need no further recommendation.

As a Disinfectant, and remedial agent too, when indicated, it is not excelled by any similar preparation. We use per manganic preparations very extensively in this Hospital, and could not do without them. I consider yours the best and most elegant preparation of the kind manufactured. Respectfully yours, &c.,

P. BRYCE, M. D.,

Sup't and Phys'n Ala. Insane Hospital.

A Perfect Pain Killer.

WESLEYAN FEMALE COLLEGE,

STAUNTON, VA., Jan. 9, 1869.

Prof. Darby:—When I was President of the LaGrange Female College of Georgia, I used your Prophylactic Fluid in the College with decided success. Both as a disinfectant and as a remedy for sores and burns, etc., it was efficacious and proved to be what it is represented. Every family and public Institution ought to have it. I wish you great success in the sale of it.

WM. A. HARRIS, D.D.

Pres. W. F. College, Staunton, Va.

Never was there a family medicine so highly recommended as this. Try it and you will never regret it.

Let every country merchant visiting New York this spring put this article in his list. But dont wait—Order at once.

And so we might fill this entire paper with recommendations from the very best men in the country.

There is no question that this is a most wonderful and useful article as a disinfectant, and for wounds, sores, burns, poisons, colic, as a tooth wash, general purifier, &c., &c.

Every Druggist or Country Merchant has it for sale.

TESTIMONIALS:

We select the following extracts for the benefit of those who have not used Rhodes' "Standard" Manures:

S. Wyatt, Esq., of Allington Plantation, near Waynesboro, Ga., writes as follows to Messrs. P. M. Rhodes & Co.:

"Your Phosphate I am highly delighted with: I gave it a fair trial alongside with several other Standard Manures, and I regard it fully equal if not superior to the best of them. On one field of 100 acres, that I am sure would not, in its natural state, have produced over 400 lbs. of seed cotton to the acre, I have already gathered 900 pounds, and think I shall get fully 200 pounds more.

"Two other fields of 100 acres, better land, I have gathered, at two pickings, over 1,000 pounds to the acre of seed cotton, and think I shall get 300 pounds more.

"I tried it, also, on corn, and found it very good, but not equal in its results to the cotton crop. Several of my neighbors, whose lands adjoin my own, and is pretty much the same character of land who used no fertilizer at all, have signally failed, making no more than half a crop. If so much as that. Where I applied Rhodes' Phosphate the cotton was heavily fruited, boll's larger, the staple longer, stouter and better than where none was used, so much so that any one, even though he may never have seen the growth before, could readily see it. Those who go on to pick cannot get the cotton to come faster than we can possibly gather it—at least, such is my experience."

P. C. Howard, Esq., of Darien, Ga., writes as follows:

"It is proper that I should say the results of the use of your fertilizer have been very marked and indeed surprising. I have made more cotton by its aid on worn out land, that has not been in cultivation in two years past than I have been able to do on the best swamp or bottom land on my place in Mississippi."

ATHENS, Ga., January 26, 1869.

Messrs. P. P. Pease & Co., Atlanta: I applied the two tons of Rhodes' Super-Phosphate, which you furnished me last year, at the rate of 400 pounds to the acre, on thin land, considerably exhausted by long continued cultivation, without manure, and have no hesitation in saying that it is an excellent fertilizer for cotton. On the eight acres to which I applied it, I picked upwards of 8,000 pounds of seed cotton—more than double what the land would have produced without the fertilizer. It is also proper to mention, that while the caterpillars stripped all the leaves and young bolls at an adjoining patch, manured with Dickson's Mixture commencing their ravages in August, they did not attack that manured with Rhodes' Super-Phosphate until the first week in October.

WILLIAM M. BROWNE.

Thousands of certificates and letters could be published showing the value of Rhodes' "Standard," a quick and permanent fertilizer.

HOW TO UTILIZE THE OAK FORESTS

—OF THE—

SOUTHERN STATES.

THE Undersigned is now ready to grant Licenses or to sell Factory or Territorial rights for the use of his Improved Appliances for the Manufacture of Imperishable Concentrated Extracts from Oak Bark, for Tanning and Coloring purposes, requiring them for either a small royalty or a reasonable consideration for excelsior rights.

A Factory complete in all its appurtenants, capable of manufacturing 50 barrels of Extract every 24 hours—will cost Eight Thousand Dollars, not including cost of motive power, which may be of Steam or Water, and of 25 Horse Power.

A Factory of half the capacity, or 25 bbls per 24 hours, will cost Five Thousand Dollars. While a Factory capable of producing from 12 to 15 bbls per day, will cost, not to exceed Three Thousand Dollars.

The above estimates include cost of Building, Tanks—which are of wood—Mill Condensing Appliances, and every requisite say motive power, which may be of Water or Steam, and of from 15 to 50 horse power as per capacity of Factory.

These new devices for Manufacturing Concentrated Extract are in practical use, and has the endorsement of the best judges as being the most perfect, simple and cheapest in use.

Competent men will be provided for putting these Factories in operation for those to whom lisences may be granted. All particulars may be learned by addressing,

L. H. BRADFIELD'S COLUMN.

DR. J. BRADFIELD'S

FEMALE REGULATOR,

Woman's Best Friend

THIS valuable Medicine is prepared for WOMEN exclusively, and to be used by WOMEN only. It is adapted especially to those cases where the WOMB is disordered, and will cure any irregularity in the "menses," except in such cases as require a surgical operation. As these last are very rare, the FEMALE REGULATOR is of almost universal application. In a sudden check of the "monthly courses" from COLD, trouble of mind or like cause, it acts like a charm, by RESTORING THE DISCHARGE IN EVERY INSTANCE, thus relieving the fever, headache, pain in the small of the back and "lower stomach," flushes of heat about the face, chilly sensations, burning of the eyelids and general restlessness. Taken in time, all these SYMPTOMS pass away immediately, without injury to the constitution. Frequently, however, the proper remedy is not applied in time, the disease becomes chronic, and the foundation laid for numberless evils to the constitution of the woman. The next "return" comes around and there is no "show," or perhaps the "whites" will appear. There will be some uneasiness about the womb, but very little or none of the natural fluid escaping. The complexion becomes sallow, bowels swollen, a sort of greenish caste about the face, constant dull aching pains in the head, weight in the lower stomach and back, with or without whites, palpitations of the heart, pallor, exhaustion, indigestion, weariness, languor, aching across the loins, loss of appetite, pain in left breast, tightness across the chest, cough and giddiness. If still all owed to go on, "green sickness" will be fully developed—the headache becomes severe, with loss of memory, diminishing sensibility, SICK STOMACH, dyspepsia, no relish for food, loss of flesh, increased fluttering of the heart, SWELLING OF THE FEET, legs and body and occasional spitting of blood. The slightest effort causes HURRIED BREATHING, almost SUFFOCATION. The skin is flabby and a "doughy feel." This is a sad picture, but it is the condition of thousands of women between the ages of 15 and 45, who are brought to the verge of the grave by ignorance or neglect to take the proper remedy. To all who are afflicted with any of the symptoms above mentioned, in connection with an irregularity of the "monthly sickness," we earnestly say TAKE DR. J. BRADFIELD'S FEMALE REGULATOR. A few ounces taken, you will at once experience its benefits, and with a little patience you will be fully restored to health.

This remedy has been extensively used for upwards of twenty years by many of the most experienced and successful Physicians of Georgia. We repeat, that DR. J. BRADFIELD'S FEMALE REGULATOR is prepared for WOMEN alone to be used by Women only.

A trial is all we ask.

ATLANTA, GA., December 29th, 1868.

Dr. J. BRADFIELD—Dear Sir: I take pleasure in stating that some time previous to the late war, I used, with the most success, on a servant girl of your FEMALE REGULATOR prepared then at Bradfield's Drug Store, West Point Ga. She had been suffering severely from suppressed menstruation, and this Medicine soon restored her to health. She is, to-day, living in Atlanta, sound and well.

I will state, further, that I know of its being used, with equal success, on a servant girl of my brother in law, Professor Rutherford, of Athens, Ga. This woman had, I think, been diseased for six years. She was a house servant, and seemed cured, up to the time of "freedom." I do not hesitate to indorse your preparation for the purposes for which you recommend it.

Yours truly, JNO. C WHITNER.

STATE OF GEORGIA, TROUP COUNTY.

This is to certify that I have examined the recipe of Dr. Joseph Bradfield, of this county, and as a medical man, pronounce it to be a combination of Medicines of great merit in the treatment of all the diseases of females for which he recommends it. WM. P. BEASLEY, M. D.

As the majority of persons living in the South are predisposed to disease of the Liver, this granted by all intelligent physicians that most of the pains and aches of our people are due to organic or functional derangement of that important organ. Prophitt's Liver Medicine and Anti-Bilious Pills strike directly at the root of the evil. They cure the Liver which, in nine cases out of ten, is at the bottom of the Coughs, Dyspepsia, Colic, Sick Headache, Rheumatism, Constipation, Menstrual Obstructions, etc., so common among our people. Earache, Toothache, Acute Rheumatism, Neuralgia and and bodily pains of every kind flee before
